Nothing beats a Motorola Original® Accessory

Police

Whether in hot pursuit or investigating a cold case, communication can be made much easier with a Remote Speaker Microphone – it lets professionals respond instantly without the need to reach for the radio controls.

Fire

It takes two hands for climbing ladders and controlling hoses, and solutions like our Chest Pack provide both welcome freedom and valued protection in the heat of the action.

Emergency Response

First responders deserve first-class tools for communicating their position and conditions, and our Lightweight Headsets help everyone quickly and clearly get the message.

Security

From crowd control to answering an alarm signaling illegal entry, a fully accessorized mobile radio helps professionals respond more quickly.

When you see the Motorola Original logo you know the products are built and tested to meet the highest standards.

Motorola Original Accessories let you make the most of your portable radio's capabilities.

You made a sound business decision when you chose your Motorola radio. When you choose performance-matched Motorola Original accessories, you're making another good call.

That's because every Motorola Original accessory is designed, built and rigorously tested to the same quality standards as Motorola radios. So you can be sure that each will be ready to do its job, time after time.

What's more, insisting on Motorola Original accessories can help increase your productivity. That's because you can count on every accessory to do its job time after time. If you take a chance on a mismatched battery, a flimsy headset or an ill-fitting carry case, your radio may not perform at the moment you have to use it.

Keep your Motorola radio performing at its peak. Count on this collection of Motorola Original accessories for your important business communication needs. You'll find remote speaker microphones for more convenient control. Carry cases for ease when on the move. Earpieces to ensure privacy. Headsets for hands-free operation. High-capacity batteries to extend work time, and more. They'll help you work smarter, harder and with greater convenience.

These dependable portable radios continue to provide a rugged and reliable solution for business communication.

HT 1000, JT 1000, MTX 8000 AND MTX 9000 PORTABLE RADIOS

With our dedication to continual improvement, we discontinue Motorola portable radio models from time to time — but the durability and ease of use you've come to expect stays intact. So with the right Motorola Original accessories, you can help ensure your radio will continue to meet your needs for a long time to come.

Accessories compatible with MT 2000 and MTS 2000.

Remote Speaker Microphone with IP57 Rating

Windporting Remote Speaker Microphone

The Windporting feature of these microphones helps lessen background noise from high winds and other severe weather conditions. Audio can pass through the speaker grill even when the microphone port is blocked by water. Now public safety professionals can be more confident than ever of clear, understandable communication when Mother Nature is uncooperative. The Windporting Remote Speaker Microphones allow talking and listening without removing the radio from the belt or case. Both have a coiled cord, Push-to-Talk switch, swivel clip, and quick disconnect latch.

Mandown, Public Safety Tilt Switch

The Mandown, Public Safety Tilt Switch functions as an external emergency switch that is activated when the radio unit is tilted at an angle greater than 60 degrees. Delay times are factory programmed for 8 seconds and are not field programmable. No other audio accessory can be attached to the radio while the tilt switch is attached. Radio must be programmed to enable the emergency tilt feature. Not compatible with the JT 1000.

Quick Disconnect Noise Kits

Extreme Noise Kits provide extra comfort and/or noise protection for users wearing surveillance accessories. Lightweight, translucent tube attaches to Motorola surveillance accessories to provide flexibility and comfort, which now includes a new quick disconnect adapter. The Quick Disconnect Adapter allows users, especially those in multiple shift operations, to easily remove or alternate acoustic tubes. Clothing clip prevents accessory from being pulled from the ear due to body movement or head rotation. For optimal performance, Extra Loud Earphones are recommended.

RLN4922 Completely Discreet Earpiece Kit

Completely Discreet Earpiece

Enables users to communicate with ease, in full privacy, without visible equipment. This miniaturized receiver is discreetly hidden in the ear, where it can be worn comfortably for long periods of time. Small as it is, it offers a full range of audio functions including automatic squelch, automatic gain control and noise filtering. Average battery life is approximately 100 hours and includes an end-of-life warning signal when the battery needs to be changed. Kit includes wireless receiver, inductive neckloop, 6 spare batteries and 5 spare earguards. For use with standard 2 or 3-Wire Motorola Surveillance Kits.

Ear Microphone System – EMS

This compact, lightweight unit picks up sound through bone vibrations in the ear. The miniature earpiece leaves the hands free and face unobscured, good for rescue and emergency personnel that must retain the ability to help, hear and speak directly to others, those not on the communication system. EMS may be worn with protective masks without reduction in sound clarity. It's ideal for high-noise environments. PTT or Voice-Activated (VOX) Interface Module required, sold separately.

Temple Transducer

The Temple Transducer represents a significant achievement in headset design and functionality. It allows the user to receive audio without covering the ear. The receiver portion of this accessory rests on the temples and is capable of converting the receive audio from a two-way radio into sound vibration. Sound vibration is transmitted through the surrounding tissue and bone directly into the inner ear. It features an In-line PTT and noise-cancelling boom microphone. The Temple Transducer can help enhance communication and safety by allowing external sounds, such as machinery and equipment, warning and fire alarms, the intercom, traffic and even casual conversations with co-workers.
In high-noise environments it allows the use of earplugs.

Motorola Conditioning Chargers – MCC

The MCC features Instant Fault Detection technology that detects faulty batteries in seconds. You'll know right away when a battery won't operate at peak performance - saving you time and trouble. Each unit rapidly charges NiCd and NiMH batteries and optimizes battery performance. It's patented negative pulse charging process minimizes overheating and overcharging, extending useful battery life. Batteries can be left on the charger for extended periods of time, without worry of heat build-up. Optional accessories are available that allow the MCC to be used in both AC and DC environments.

IMPRES™ Smart Energy System:

The IMPRES Smart Energy System automatically reconditions IMPRES batteries based on actual usage.

IMPRES Smart Energy Systems

IMPRES Chargers

Through the use of its advanced charging algorithm and automatic reconditioning features, the IMPRES Smart Energy System ensures maximum talk-time and optimized battery cycle life. This smart energy system automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. Talk-time and cycle life are optimized and the need for manual maintenance programs is eliminated. Its advanced conditioning features allow batteries to be safely left on the charger for extended periods of time without incurring damaging heat build-up which can decrease battery cycle life. In addition, batteries left in the charger are kept fully charged so they are always ready when needed. This rapid-rate, tri-chemistry charging system will also charge compatible non-IMPRES batteries and supports multiple radio platforms including SABER, XTS and HT 1000 Series portables.

Hospitality

Whether in pursuit of a guest request or investigating housekeeping productivity, communication with a Remote Speaker Microphone lets professionals respond instantly without need to reach for the radio controls.

Retail

It takes two hands for ringing sales and managing stock, and solutions like our headsets provide both welcome freedom and valued protection in the heat of the action.

Business

Business class professionals deserve first-class equipment for communicating, and our Lightweight Headsets help everyone quickly and clearly get the message.

Security

From crowd control to answering an alarm signaling illegal entry, a fully accessorized mobile radio helps professionals respond more quickly.

Compact and capable, VISAR portable radios continue to help professionals stay in contact.

VISAR RADIOS

The discontinued VISAR is still one of the smallest full power, fully featured two-way radios around. It will fit comfortably into the palm of your hand or in your pocket, with the same output power as a radio twice its size. You have the immediate communication of a paging system with the instant response of a two-way radio.

Motorola Conditioning Chargers – MCC

The MCC features Instant Fault Detection technology that detects faulty batteries in seconds. You'll know right away when a battery won't operate at peak performance - saving you time and trouble. Each unit rapidly charges NiCd and NiMH batteries and optimizes battery performance. It's patented negative pulse charging process minimizes overheating and overcharging, extending useful battery life. Batteries can be left on the charger for extended periods of time, without worry of heat build-up. Optional accessories are available that allow the MCC to be used in both AC and DC environments – that's flexibility.

6-Station Battery Maintenance System^{PLUS}

Battery Maintenance System^{PLUS} – BMS^{PLUS}

Increase the useful life of your batteries. Using interchangeable battery adapters (sold separately), the BMS^{PLUS} is capable of charging and discharging, analyzing, conditioning and cycle testing batteries. It supports NiCd, NiMH and LiIon batteries (LiIon 6-station units only) and tracks better voltage and capacity (mAh). Its easy-to-use design supports hundreds of two-way, cellular and camcorder batteries. The BMS^{PLUS} has a 3-year warranty and includes serial printer* port (RS-232).

Battery Optimizing System II – BOS II

No other battery analyzer matches the speed, accuracy, versatility and ease-of-use of the BOS II in providing powerful analyzing capabilities. Users can select from 12 pre-programmed service programs making it quick and easy to get up and running. Because the BOS II is programmable, users can create custom programs to perform a wide variety of tasks specific to individual needs. New enhancements include new navigation keys and an improved, more intuitive menu system. Regular use of the BOS II can optimize battery performance and help extend battery life, helping reduce battery replacement costs.

- Support for NiCd, NiMH, LiIon, and SLA batteries 100W Power Supply programmable from 100 mAh to 4 Amps per station
- Interchangeable Adapters accommodate all major brands
- Includes a variety of User Programs and allows customizable programming
- Proprietary Recondition Cycle restores NiCd and NiMH batteries
- Increased processing power and testing resolution – including a Three-minute Quicktest™ that measures the batteries' State of Health (SoH) Printer Output for reports and labels
- Three-year Warranty

Motorola Original Accessories let you make the most of your radio's capabilities.

You likely chose your Motorola mobile radio for its ease of use and exceptional reliability — certainly a sound business decision. Choosing Motorola Original accessories for your radio is also the right call to make.

That's because every Motorola Original accessory is designed, built and rigorously tested to the same quality standards as Motorola radios. So you can be sure that each will be ready to do its job, time after time.

What's more, insisting on Motorola Original accessories can help increase your productivity. That's because you can count on every accessory to do its job time after time. If you take a chance on a mismatched antenna, a clumsy handset or an ill-fitting mounting, your radio may not perform at the moment you have to use it.

Keep your Motorola radio performing at its peak. Count on this collection of Motorola Original accessories for your important business communication needs. You'll find Speakers to help get the word out. In-vehicle mounting accessories for ease of use when on the move. Control Station accessories for an efficient, streamlined operation. A variety of antennas to extend range, and help maximize communication in urban areas. They'll help you work smarter, harder and with greater convenience.

MCS 2000 mobile radios continue to help professionals on the move stay connected.

MCS 2000 RADIOS

This discontinued full-featured mobile analog radio is compact and lightweight, yet is packed with power and performance. Built on a truly flexible platform, it is dynamic enough to change with the times through easy and economical software upgrades plus the wide selection of Motorola Original® accessories on the following pages.

The above diagram compares a Unity gain or 0dB antenna with 3dB and 6dB radiation patterns. From the diagram above you can see that it is possible to communicate with a cell site further away. There are a few traps however, these high frequency signals have a tendency to bounce off buildings in built up areas, and off mountains in a valley. This means a high gain antenna is best-used in country areas where wide flat plains are between you and the cell site. In mountainous areas or in city environments where the topography varies considerably, a high gain radiation pattern will not work as efficiently as a unity gain.

Low Profile Antenna Kits

These complete kits make installation easy for multipoint mobile applications. Perfect for service vehicles, public transportation, law enforcement, mining and construction vehicles, as well a numerous other commercial and industrial applications where mobility is a requirement. All kits include a 3/4 inch brass mount with 17 feet of RG58U/U cable.

The above diagram compares a Unity gain or 0dB antenna with 3dB and 6dB radiation patterns. From the diagram above you can see that it is possible to communicate with a cell site further away. There are a few traps however, these high frequency signals have a tendency to bounce off buildings in built up areas, and off mountains in a valley. This means a high gain antenna is best-used in country areas where wide flat plains are between you and the cell site. In mountainous areas or in city environments where the topography varies considerably, a high gain radiation pattern will not work as efficiently as a unity gain.

MARATRAC®

MARATRAC mobile radios can continue to provide dependable communication wherever your vehicle takes you.

MARATRAC RADIOS

With the small control head of this two-piece, discontinued mobile radio, you can continue to mount the unit anywhere in a vehicle. Dedicated buttons provide easy control of features like scan, multiple Private Line codes, signalling calls, external alarms, and repeater Talkaround.
